

1. Record Nr.	UNINA9910677353203321
Titolo	Innovative and emerging technologies for textile dyeing and finishing / / edited by Luqman Jameel Rather, Aminoddin Haji and Mohd Shabbir
Pubbl/distr/stampa	Hoboken, New Jersey ; ; Beverly, Massachusetts : , : Scrivener Publishing : , : Wiley, , [2021] Â©2021
ISBN	1-119-71028-6 1-119-71031-6 1-119-71029-4
Descrizione fisica	1 online resource (xvi, 414 pages)
Disciplina	746.6
Soggetti	Dyes and dyeing - Textile fibers
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Eco-friendly stimuli and their impact on the tinctorial capacity of textile materials / Vasilica Popescu and Luminita Ciobanu.
Sommario/riassunto	"Despite large number of books on dyeing and finishing of textiles and various papers on advanced technologies for improvement of dyeing and finishing of textiles especially with regard to environmental and ecological aspects, there is no book on market focusing on advanced methods and processes for textile wet processes. This book will cover the recent advances in textile wet processes and will update the students, researchers and industries concerned with the modern textile technologies"--
