Sommario/riassunto	Playwright, novelist, political theorist, literary critic and philosopher, Jean-Paul Sartre (1905-80) remains an iconic figure. This book examines his philosophical ideas and methods. It is an introductory guide for the student who wishes to understand Sartre's philosophical argumentation. It reconstructs in plain language key instances of Sartre's philosophical reasoning at work and shows how certain questions arise for Sartre and what philosophical tools he uses to address those questions. Each chapter considers a range of issues in the Sartrean corpus including his conception of phenomenolo

Sommario/riassunto

Topics in Stereochemistry, Materials-Chirality provides comprehensive information on the stereochemistry of materials. Coverage includes the chirality of materials and the important role stereochemistry plays in the physical properties of polymers, liquid crystals, and other materials.
