

1. Record Nr.	UNINA9910677887603321
Autore	Bilous Rudy W.
Titolo	Handbook of diabetes // Rudy Bilous, Richard Donnelly, Iskandar Idris
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley Blackwell, , [2021] ©2021
ISBN	1-118-97597-9 1-118-97599-5 1-118-97607-X
Edizione	[5th ed.]
Descrizione fisica	1 online resource (307 pages)
Disciplina	616.462
Soggetti	Diabetes Diabetes - Complications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	Cover -- Title Page -- Copyright Page -- Contents -- Preface -- Key to the boxes -- List of abbreviations -- Part 1 Introduction to diabetes -- Chapter 1 Introduction to diabetes -- Further Reading -- Chapter 2 History of diabetes -- Further Reading -- Chapter 3 Diagnosis and classification of diabetes -- Intermediate categories of hyperglycaemia: Pre-diabetes -- Classification of diabetes -- FURTHER READING -- Chapter 4 Public health aspects of diabetes -- Primary prevention of Type 2 Diabetes -- Providing access to structured diabetes education -- Improving diabetes treatment and care -- Commissioning diabetes services -- Further Reading -- Chapter 5 Normal physiology of insulin secretion and action, and the incretin effect -- Islet structure and function -- Insulin synthesis and insulin polypeptide structure -- Insulin secretion -- The incretin effect -- Insulin receptor signalling -- The family of GLUT transporters -- Further Reading -- Chapter 6 Epidemiology and aetiology of type 1 diabetes -- Introduction -- Epidemiology -- Aetiology -- Genetics -- Environmental and maternal factors -- Viruses -- Apoptosis -- Dietary factors -- Toxins -- Animal models -- Hygiene hypothesis -- Accelerator hypothesis -- Further Reading -- Chapter 7 Epidemiology and aetiology of type 2 diabetes -- Prevalence rates and global burden

-- Urban versus rural -- Impaired glucose tolerance -- Incidence -- Risk factors for type 2 diabetes -- Conclusion -- FURTHER READING -- Chapter 8 Other types of diabetes -- Introduction -- Monogenic Diabetes and association with other Inherited Conditions -- Other monogenic causes -- Pancreatic disease -- Diabetes complicating other endocrine diseases -- Medication associated diabetes -- Further Reading -- Part 2 Metabolic control and complications -- Chapter 9 Diabetes control and its measurement -- Introduction. Capillary blood glucose monitoring -- Urine glucose monitoring -- Glycated haemoglobin -- IFCC standard -- Estimated average glucose (eAG) -- Glucose variability -- Fructosamine -- Urine and blood ketone measurements -- Continuous glucose monitoring (CGM) systems -- Further Reading -- Chapter 10 Management of type 1 diabetes -- Insulin replacement -- Intensive insulin therapy -- Diet and Carbohydrate counting -- Glycaemic targets -- Continuous subcutaneous insulin infusion -- Further Reading -- Chapter 11 Management of type 2 diabetes -- FURTHER READING -- Chapter 12 Diabetic ketoacidosis (DKA), hyperglycaemic hyperosmolar state (HHS) and lactic acidosis -- Precipitating factors for diabetic ketoacidosis -- Pathophysiology -- Treatment -- Complications of diabetic ketoacidosis -- Hyperosmolar hyperglycaemic state -- Lactic acidosis -- Further Reading -- Chapter 13 Hypoglycaemia -- FURTHER READING -- Chapter 14 Causes of complications -- Hyperglycaemia -- Blood pressure -- Metabolic memory -- How does hyperglycaemia cause tissue complications? -- Further Reading -- Chapter 15 Diabetic eye disease -- Pathology and clinical appearances -- Factors associated with the development of retinopathy -- Classification of retinopathy -- Treatment of retinopathy -- Surveillance and screening -- Further Reading -- Chapter 16 Diabetic nephropathy -- Natural history -- Stages of nephropathy -- Epidemiology -- Screening for nephropathy -- Pathology and pathophysiology -- Risk factors for nephropathy -- Management -- Is it diabetic nephropathy? -- Further Reading -- Chapter 17 Diabetic neuropathy -- Chronic sensorimotor neuropathy -- Further Reading -- Chapter 18 Blood lipid abnormalities -- Further reading -- Chapter 19 Hypertension in diabetes -- Causative links -- Definition of hypertension and targets -- Diagnosis of hypertension -- Management -- FURTHER READING. Chapter 20 Macrovascular disease in diabetes -- Atherosclerosis -- Glycaemic vascular injury -- FURTHER READING -- Chapter 21 Foot problems in diabetes -- FURTHER READING -- Chapter 22 Sexual problems in diabetes -- FURTHER READING -- Chapter 23 Gastrointestinal problems in diabetes -- Symptoms -- Oesophagus -- Gastroparesis -- Small bowel -- Large bowel -- Abdominal pain -- Gut microbiota -- Further Reading -- Chapter 24 Non-alcoholic liver disease (NAFLD) -- Introduction -- Definition -- Risk factors for NAFLD -- NAFLD and diabetes -- Screening -- Management -- Thiazolidinediones -- Glucagon-like peptide-1 analogs and DPP-4 inhibitors -- Sodium Glucose cotransporter 2 inhibitors -- Vitamin E -- Bariatric surgery -- Statins -- FURTHER READINGS -- Chapter 25 Diabetes and cancer -- Introduction -- Epidemiology -- Possible biological mechanisms -- Effect of diabetes on cancer mortality and treatment -- Effects of cancer therapy on diabetes -- Effects of diabetes therapies on cancer incidence and progression -- FURTHER READING -- Chapter 26 Skin and connective tissue disorders in diabetes -- Diabetic dermopathy -- Necrobiosis lipoidica diabetorum -- Acanthosis nigricans -- Diabetic bullae -- Granuloma annulare -- Skin thickening, waxy skin, and stiff joints -- Other skin conditions -- FURTHER READING -- Chapter 27 Psychological

and psychiatric problems in diabetes -- Depression and anxiety -- Diabetes distress -- Cognitive changes -- Severe Mental Illness -- Published guidance. -- FURTHER READING -- Part 3 The spectrum and organisation of diabetes care -- Chapter 28 Intercurrent situations that affect diabetes control -- Exercise -- Drugs -- Infections -- Enteral feeding -- Surgery and critical intercurrent illness -- FURTHER READING -- Chapter 29 Pregnancy and diabetes -- Effects of pregnancy on the woman with diabetes. Effects of maternal diabetes on the pregnancy -- Management of pregnancy in diabetes -- Gestational diabetes -- Contraception -- FURTHER READING -- Chapter 30 Diabetes in childhood and adolescence -- FURTHER READING -- Chapter 31 Diabetes in old age -- FURTHER READING -- Chapter 32 Diabetes and lifestyle -- Introduction -- Smoking -- Alcohol -- Drug and substance abuse -- Driving -- Employment -- Travel and leisure activities. -- FURTHER READING -- Chapter 33 Organisation of diabetes care: integrating diabetes service -- What is integrated diabetes care? -- What are the essential components to an integrated diabetes service? -- Impact of COVID-19 pandemic: lessons on organizing diabetes care -- FURTHER READING -- Chapter 34 Transplantation and stem cell therapy -- Pancreas transplantation -- Islet cell transplantation -- Xenotransplantation -- Stem cell therapy -- Gene therapy -- Index -- EULA.

Sommario/riassunto

"For over 20 years, our Handbook of Diabetes has been the perfect practical companion to its parent Textbook of Diabetes, one of Wiley's key medical copyrights and widely considered the most clinically-focused diabetes reference book. Cheaper, more practical/accessible, and less scientifically dense than reference books, the Handbook of Diabetes is perfect reading for all health professionals with an interest in diabetes, especially doctors in speciality diabetes/endocrinology training, foundation level doctors, diabetes specialist nurses, and GPs. Its focus is clearly on the clinical aspects of the disease and in particular, how to best manage patients suffering from diabetes. As well is the strong emphasis on the clinical, readers love its visual look and high production standards. Clear and easy-to-navigate, it's packed full of case histories, key learning/practice points, landmark clinical trials and additional resources to consult in every chapter, and benefits from a well-designed and full colour interior throughout. To support the text, over 400 figures, including 300 beautifully drawn colour diagrams provide the reader with a visual element unmatched in other diabetes handbooks"--
