

1. Record Nr.	UNINA9910677918003321
Titolo	Handbook of forensic medicine // edited by Burkhard Madea
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , [2022] ©2022
ISBN	1-119-64858-0 1-119-64862-9 1-119-64861-0
Edizione	[Second edition.]
Descrizione fisica	1 online resource (3799 pages)
Disciplina	614.1
Soggetti	Forensic nursing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Table of Contents -- Volume 1 -- Title Page -- Copyright Page -- List of Contributors -- Preface to the Second Edition -- Preface to the First Edition -- Foreword by Denis A. Cusack -- Foreword by Duarte Nuno Vieira -- PART I: Duties of Forensic Medicine in Modern Societies -- 1 History -- 1.1 Definitions -- 1.2 Civilisations of the Near East and China -- 1.3 Justinian enactments -- 1.4 Further developments and Italian town charters -- 1.5 Forensic medicine as a book science -- 1.6 Forensic medicine as an experimental science -- 1.7 Current problems -- References and further reading -- 2 Duties of Forensic Medicine and the Forensic Medicine Practitioner -- References and further reading -- 2.1 The Expert Witness -- Acknowledgements -- References and further reading -- 3 Forensic Medicine and Human Rights -- 3.1 Human rights issues -- 3.2 Torture -- Useful websites -- 4 International Guidelines and Accreditation in Forensic Medicine -- 4.1 Introduction -- 4.2 Recommendations for forensic DNA laboratories based on ISO/IEC 17025 -- 4.3 Recommendations for forensic toxicological laboratories based on ISO/IEC 17025 -- 4.4 Recommendations for forensic pathology based on ISO/IEC 17025 -- 4.5 Recommendations for clinical forensic medicine based on ISO/IEC 17020 -- Appendix: Definitions (ENFSI Appendix 4) -- Useful websites -- References and further reading -- PART II: Medical Aspects of Death

-- 5 Nature and Definition of Death -- 5.1 Death and dying -- 5.2 Determination of death -- References and further reading -- 6 Certification of Death -- 6.1 Introduction -- 6.2 Cause of death -- 6.3 Causes of death as shown by cause of death statistics -- 6.4 Consistency between cause of death diagnosis on the death certificate and following autopsy -- 6.5 Manner of death -- 6.6 Special constellations of circumstances in external postmortem examination. 6.7 Checklist for the external postmortem examination -- 6.8 Identification of the corpse -- 6.9 Examination of the corpse -- 6.10 Completing the death certificate -- Useful website -- References and further reading -- 7 Postmortem Changes and Time since Death -- 7.1 Early Postmortem Changes -- 7.2 Later Postmortem Changes: Decomposition -- 7.3 Timing of Death -- 7.4 Basic Forensic Entomology -- References and further reading -- 7.5 Postmortem Injuries -- References -- References and further reading - Chapter 7.1-7.3 -- 8 Cremation -- 8.1 Short history of cremation -- 8.2 Cremation in the modern day -- 8.3 Process of cremation and modification of the corpse during cremation -- 8.4 Remnants of cremation -- 8.5 Conclusions -- 8.6 Embalming -- References and further reading -- 9 Crime Scene and Crime Scene Investigations -- 9.1 General considerations -- 9.2 Equipment -- 9.3 Tasks for the forensic pathologist -- 9.4 Time of death -- 9.5 Examination of the body -- 9.6 Examination of the surroundings -- 9.7 Sample collection -- 9.8 Documentation -- 9.9 Cause and manner of death -- 9.10 Conclusions -- 9.11 Bloodstain pattern analysis -- References and further reading -- 10 Autopsy -- 10.1 An Introduction to Autopsy -- 10.2 Medicolegal Autopsy -- 10.3 Clinical Autopsy -- 10.4 Autopsy Report -- 10.5 Exhumation -- References and further reading -- 10.6 Forensic Imaging and CT Angiography -- References and further reading -- Bibliography -- 10.7 Molecular Pathology -- References -- 10.8 Forensic Microbiology -- References -- 11 The Doctor, the Dead and the Relatives -- 11.1 Introduction -- 11.2 The work of mourning and its complexity -- 11.3 Death, defence mechanisms, burnout, compassion fatigue and moral distress -- 11.4 Death, communication and reactions of family members. 11.5 Assessment, recognition, cultural contexts, farewell to the relative and death certificate -- References and further reading -- 12 Transplantation -- 12.1 Regulations and procedures of transplantation in selected countries -- 12.2 Criteria for the diagnosis of brain death -- Acknowledgements -- Useful websites -- References and further reading -- 13 Anthropology and Osteology -- 13.1 Introduction -- 13.2 Preliminary steps -- 13.3 Diagnosis of species -- 13.4 Biological profile: the main role of anthropology -- 13.5 Facial approximation -- 13.6 Geographical origin -- Useful website -- References and further reading -- 14 Mass Disaster Victim Identification -- 14.1 An Introduction to Mass Disaster Victim Identification -- 14.2 International Cooperation -- 14.3 DVI Team Structure -- 14.4 Standardisation -- 14.5 Forensic Odontology Standards -- 14.6 Forensic Molecular Biology Standards -- 14.7 Radiology Standards -- 14.8 Chemical, Biological, Radiological, Nuclear Explosive Weapons -- 14.9 Documentation and Quality Management -- Useful websites -- References and further reading -- 14.10 Radiology Guidelines for Mass Fatalities -- References and further reading -- 14.11 Fire Fatalities -- References and further reading -- 14.12 Terrorist Attacks -- References -- PART III: Traumatology and Violent Death -- 15 Legal Aspects of Traumatology and Violent Death -- 15.1 Definitions -- 15.2 Basic legal principles -- 15.3 Conclusions -- 16 Traumatology and Criminology -- 16.1 Introduction -- 16.2 Homicide -- 16.3 Nonhomicidal events -- 16.4

Suicide -- 16.5 Torture -- 16.6 Homicide, suicide or accident? -- 17
Some Preliminary Remarks Concerning Biomechanical Principles -- 17.1
Introduction -- 17.2 Separation of coherence through the impact of
tensile stress -- 17.3 Separation of coherence through the impact of
shear stress -- References and further reading.
18 Sequelae of Traumatic Injuries and Causes of Death -- 18.1
Introduction -- 18.2 Sepsis and multiple organ failure -- References
and further reading -- 19 Vital Reactions -- 19.1 Vital reactions: An
introduction -- References and further reading -- 19.2 WoundAge
Estimation: General Introduction and Methods -- References and
further readings -- 19.3 WoundAge Estimation: Molecular Biology --
References and further reading -- 19.4 Principles of Bone Fracture
Healing -- References and further reading -- 20 Mechanical Trauma
and Classification of Wounds -- 20.1 Classification of Violence -- 20.2
Blunt Force Injury -- Additional references -- 20.3 Homicides by
Kicking -- References and further reading -- 20.4 Forensic
Neuropathology -- References and further reading -- References -- 21
Forensic Ballistics -- 21.1 Introduction -- 21.2 Firearms -- 21.3
Ammunition -- 21.4 Shotgun ammunition -- 21.5 Interior ballistics --
21.6 Exterior ballistics -- 21.7 Intermediate targets -- 21.8 Wound
ballistics -- 21.9 Incapacitation -- 21.10 Forensic reconstruction --
21.11 Differentiation of suicide and homicide -- 21.12 The hand firing
or steadying the gun -- 21.13 Prior exposure of the entrance wound --
21.14 Defensive injuries -- 21.15 Accidents -- 21.16 Miscellaneous --
21.17 Arrow wounds -- 21.18 Explosive injuries -- 21.19 Mechanisms
of injury -- References -- 22 Asphyxiation -- References -- 22.1
Injuries due to Asphyxiation and Drowning -- References and further
reading -- 22.2 DROWNING -- References -- 22.3 Barotrauma and
DivingRelated Accidents -- References -- 22.4 Immersion Time --
References and further reading -- 22.5 Death in High Altitude and
Barotrauma -- References -- Volume 2 -- Title Page -- Copyright Page
-- List of Contributors -- Preface to the Second Edition -- Preface to
the First Edition -- Foreword by Denis A. Cusack.
Foreword by Duarte Nuno Vieira -- 23 Injuries Due to Heat -- 23.1
Introduction -- 23.2 Burns from heat -- 23.3 Causes of death -- 23.4
Scalding -- 23.5 Generalised heat damage and hyperthermia -- 23.6
Diagnosis -- References and further reading -- 24 Injuries Due to Cold
-- 24.1 Introduction -- 24.2 Pathophysiology -- 24.3 Clinical phases
of hypothermia -- 24.4 Epidemiology -- 24.5 Morphological and
biochemical changes -- 24.6 Criminalistic aspects -- References and
further reading -- 25 Electrocutation and Lightning -- 25.1 Electrocutation
-- 25.2 Lightning -- 25.3 Conclusion -- Useful websites -- References
and further reading -- NEW FIGURES -- 26 Starvation and Neglect --
26.1 Introduction -- 26.2 Clinical starvation -- 26.3 Fatal starvation --
26.4 Classification systems -- 26.5 Death from starvation -- 26.6
Physical neglect -- 26.7 Sarcopenia -- 26.8 Glossary -- References and
further reading -- 27 Infanticide -- 27.1 Stillbirth -- 27.2 Neonaticide
-- 27.3 Investigation of mothers and neonates -- References -- 28
Death During Pregnancy -- 28.1 Analysis of maternal mortality -- 28.2
Pregnancy as a physiological process with specific risks -- 28.3
Maternal death directly due to gestation -- 28.4 Maternal death
indirectly due to gestation -- 28.5 Iatrogenic maternal death -- 28.6
Maternal death not due to gestation -- Useful websites -- References
and further reading -- 29 Autoerotic Death -- 29.1 General aspects --
29.2 Categorisation of death cases -- 29.3 Possible mechanisms of
death -- 29.4 Typical injuries to male genitalia and special cases, such
as chemsex -- References and further reading -- 30 Death in an
Abnormal Position -- 30.1 Incustody and restraint death -- 30.2

Extrinsic factors -- 30.3 Intrinsic factors -- 30.4 Controversies: excited delirium -- 30.5 Investigation of death in custody: restraint and body position.

30.6 Certification of death.

Sommario/riassunto

"Forensic medicine encompasses all areas in which medicine and law interact, i.e. the diverse aspects of forensic medicine include forensic pathology, traumatology and violent death, sudden and unexpected death, clinical forensic medicine, toxicology, traffic medicine, identification, haemogenetics and medical law. A knowledge of all the subdisciplines of forensic medicine is required in daily routine casework since all the results obtained by different medical and scientific methods have to be integrated into one comprehensive reconstruction of events for any particular case"--
