Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (72 pages)
Collana	SpringerBriefs in economics
Disciplina	381
Soggetti	Distributive justice Economic development Income distribution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter 1. Introduction -- Chapter 2. Inequalities and economic inequality -- Chapter 3. Economic inequality -- Chapter 4. Economic growth -- Chapter 5. Inequality and growth -- Chapter 6. Inequality of opportunities -- Chapter 7. Recent trends of growth and inequality in a post-pandemic world -- Chapter 8. Summary remarks.
Sommario/riassunto	This book focuses on economic inequality, its measurement, and its relationship with economic growth and development. The current literature uses multiple points of view, ranging from ethical, legal, philosophical, to political and economic, to understand the nature of (in)equality. Presenting the problem objectively, this book shows how to measure the phenomenon statistically along with an international comparison of the level of income inequality and economic growth and of their complex relationship. The book also analyzes three decades of theoretical and empirical evidence to understand this phenomenon and discusses a number of political measures to reduce economic disparities while stimulating economic growth.
