Sommario/riassunto	This book focuses on Indigenous self-determined and community-owned responses to complex socioeconomic and political challenges in

Australia, and explores Indigenous policy development and policy expertise. It critically considers current practices and issues central to policy change and Indigenous futures. The book foregrounds the resurgence that is taking place in Indigenous governing and policy-making, providing case studies of local and community-based policy development and implementation. The chapters highlight new Australian work on what is an international phenomenon. This book brings together senior and early career political scientists and policy scholars, and Indigenous and non-Indigenous scholars working on problems of Indigenous policy and governance.
