Economists have not always been on friendly terms with scientists from other fields. More than once, economists have been accused of 'imperialism' or criticized for neglecting the insights obtained in other fields. The history of economics, however, yields manifold examples of interdisciplinary 'borrowing' where economists have adapted concepts and theories from other fields. This book deals with the exchanges (or sometimes the lack thereof) between economics and neighbouring disciplines. The contributions examine specific cases and episodes taken from the history of economics, indica
