Sommario/riassunto	Telecommunication has never been perfectly secure, as a Cold War culture of wiretaps and international spying taught us. Yet many still take their privacy for granted, even as we become more reliant on telephones, computer networks and electronic transactions of all kinds. Many of our relationships now use telecommunication as the primary mode of communication that the security of these transactions has become a source of wide public concern and debate. The authors argue that if we are to retain the privacy that characterized face-to-face relationships in the past, we must build the means of p
