

1. Record Nr.	UNINA9910682548303321
Titolo	Emerging ocular infections // edited by Careen Y. Lowder, Nabin Shrestha, and Arthi Venkat
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG, , [2023] ©2023
ISBN	3-031-24559-8
Descrizione fisica	1 online resource (119 pages)
Collana	Essentials in Ophthalmology, , 2196-890X
Disciplina	617.71
Soggetti	Eye - Infections Mycoses - Immunological aspects Mycobacterial diseases Tuberculosis Eye - Diseases Eye Infections Infections - immunology Mycobacterium Infections Nontuberculous Mycobacteria Mycobacterium Infections, Nontuberculous Eye Diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	1. Ocular tuberculosis / Aniruddha Agrwal, Vishali Gupta, and Lulette Tricia Bravo -- 2. Nontuberculous mycobacterial infections / Andrew Zheng, Cyndee Miranda, and Arthi Venkat -- 3. Syphilis: emerging ocular infections / Jessica L. Cao, Careen Y. Lowder, and Steven M. Gordon -- 4. Fungal infections / Jordan D Deaner, Eric Cober, and Sumit Sharma -- 5. Viral retinitis / Carlos Isada, Ryan Miller, Arthi Venkat, and Rebecca Chen -- 6. Vector-borne infections / Sara L. Hojjatie, Steven Yeh, Jessica G. Shantha, Lucileia Teixeira, and John L. Johnson -- 7. Parasitic and other unusual intraocular infections / Matthew P. Nocholas, Sana Indrees, Angela P. Bessette, Jem Marie P. Golbin, and Jona M. Banzon.

The book offers comprehensive coverage on novel manifestations of known infections, novel infections with documented ophthalmic involvement, and the growing issue of resistance among certain infections. Filling a much-needed gap in current literary offerings, chapters approach ophthalmic manifestations of infectious disease from a novel perspective. Each chapter is co-written by an ophthalmologist and an infectious disease specialist to provide multidisciplinary insight. This unique analysis of infectious disease enhances the ability of ophthalmologists and infectious disease specialists to identify the manifold manifestations of both common and rare infections in the eye. Chapters begin with a general introduction, and each contain an Infectious Disease section, along with an Ophthalmology section. The book covers infections such as viral retinitis, fungal infections, syphilis, tuberculosis, vector-borne illnesses, and delve into rarer conditions such as unusual post-operative infections. Concise and practical, *Emerging Ocular Infection* will be of use to ID specialists, and ophthalmologists alike.
