

1. Record Nr.	UNINA9910682591003321
Autore	Shayler David J.
Titolo	Gemini 5 : eight days in space or bust // David J. Shayler
Pubbl/distr/stampa	Cham, Switzerland : , : Springer, , [2023]
ISBN	9783031113789 9783031113772
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (442 pages)
Collana	Springer Praxis books
Disciplina	629.4584
Soggetti	Extravehicular activity (Manned space flight) Space flight to the moon
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Chapter 1. Pushing the envelope -- Chapter 2. Gordo and Pete -- Chapter 3. Apollo, MOL and the Soviets -- Chapter 4. Preparations -- Chapter 5. "We're on our way" -- Chapter 6. Gemini 5's Two Little Rascals -- Chapter 7. "When are we gonna get the fuel cell back?" -- Chapter 8. Chasing a phantom -- Chapter 9. "Right in that same nice big black void" -- Chapter 10. "Still clanking along in the old, covered wagon" -- Chapter 11. Another Bright Day -- Chapter 12. One hundred down, twenty-two to go -- Chapter 13. A 300-coffee-cup-per-shift mission -- Chapter 14. "Everything is just peachy keen" -- Chapter 15. Somersaults on the flight deck -- Chapter 16. Post-flight, presidents, and parades -- Chapter 17. Afterwards.
Sommario/riassunto	This third book of the Gemini mission series focuses on the flight that simulated in Earth orbit the duration of an eight-day Apollo mission to the Moon. After the proof-of-concept test flights Gemini 1, 2 and 3 (as described in GEMINI FLIES!) and the success of the first American EVA as well as the four-day U.S. mission (GEMINI 4), NASA gained the confidence to gradually increase mission time spent in orbit. This is the first known book to focus solely on the Gemini 5 mission and its challenges with equipment failures and difficult living conditions. The mission was targeted to double the endurance of the previous one, and as such was an integral stepping stone for an even more audacious mission four months later. Attempting the eight- and then fourteen-

day durations would be an opportunity for America to gain the lead in space exploration over the Soviets. This mission pioneered the duration of a flight to the Moon and back three years before Apollo 8 made that journey, without a lunar landing, for the first time.
