

1. Record Nr.	UNINA9910682594303321
Titolo	Educating the sustainability leaders of the future // Walter Leal Filho [and four others], editors
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG, , [2023] ©2023
ISBN	3-031-22856-1
Edizione	[First edition.]
Descrizione fisica	1 online resource (x, 688 pages) : illustrations (chiefly color)
Collana	World Sustainability Series
Disciplina	363.70071
Soggetti	Environmental education Sustainability - Study and teaching (Higher) Universities and colleges - Environmental aspects Universities and colleges - Public services
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Health at the Margins: Exploration of an Academic Studio Approach to Design for Physical and Mental Resilience in a Sustainable Context -- Mapping Migration in the SDGs: A Pedagogical Tool of Sustainability Learning for Students of Migration -- Creating Space for Student Action and Reflection on Sustainable Development Goal 2: Zero Hunger -- Roll the Dice: Using Game-Based Learning to Teach Sustainability in Higher Education -- Be(coming) an Ambassador of Transformative Change from the Inside Out -- Active Learning to Foster Economic, Social, and Environmental Sustainability Awareness -- Academic Community Expectations on Climate Change Learning and Engagement: A Case Study at University of Passo Fundo.
Sommario/riassunto	This book focuses on 'educating the sustainability leaders of the future' and will contribute to the further development of this fast-growing field. As the title suggests, it presents practical experiences related to education, research and extension, the so-called third mission, whereby universities conduct outreach to society as a whole (e.g. to local communities, organisations, industry, and other groups) with the aim of documenting such experiences and making them available to a wide audience. This book is produced by the European School of

Sustainability Science and Research (ESSSR), through the Inter-University Sustainable Development Research Programme (IUSDRP) and contains inputs from authors from across all geographical regions. It gives a special emphasis to the participation of future generations on sustainability efforts. The book also discusses examples of initiatives coordinated by universities but involving civil society, the private sector, and public sector (including local, national, and intergovernmental bodies). In particular, it describes practical experiences, partnerships, networks, and training schemes for building capacity aimed at fostering the cause of sustainable development at institutions of higher education. Thanks to its design and the contributions by experts from various areas, it provides a welcome contribution to the literature on sustainable development, and it inspires further works in this field.
