Why The Hague Convention Isn't Enough: addressing enabling environments for criminality in intercountry adoption -- Chapter 13. Tackling criminal family networks in the Netherlands: observations & approaches -- Chapter 14. Are Dark Number Estimates of Crime Feasible and Useful?.
Sommario/riassunto	This edited volume brings together the most recent research about various aspects of organized crime and the responses that have developed worldwide as a result to contain serious criminal acts. This

book focuses particularly on the way criminal networking and illegal markets have developed during the first two decades of the 21st century. It examines how these developments have influenced the motivations and opportunities to commit organized crime. The volume not only focuses on illegal activities in illegal markets, such as drug and human trafficking, but also addresses organized crime and deviance in various legitimate industries. The contributions were presented at seminars of the Centre for Information and Research on Organized Crime (CIROC), and will be of particular interest to organized crime scholars and researchers, as well as advanced students of criminology across the world.
