

1. Record Nr.	UNISALENT0991003762789707536
Autore	Ive, Roberto
Titolo	Mongolia / Roberto Ive, Aldo Colleoni
Pubbl/distr/stampa	Milano : ClupGuide, 1995
ISBN	8870059316
Descrizione fisica	205 p. : ill. ; 17 cm.
Altri autori (Persone)	Colleoni, Aldoauthor
Soggetti	Mongolia - Guide
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910778499303321
Titolo	Form and function in language research [[electronic resource]] : papers in honour of Christian Lehmann / / edited by Johannes Helmbrecht, ... [et al.]
Pubbl/distr/stampa	New York, NY, : Mouton de Gruyter, 2009
ISBN	1-282-29658-2 9786612296581 3-11-173860-4 3-11-021613-2
Descrizione fisica	1 online resource (362 p.)
Collana	Trends in linguistics. Studies and monographs ; ; 210
Classificazione	ES 480
Altri autori (Persone)	HelmbrechtJohannes
Disciplina	415
Soggetti	Grammar, Comparative and general - Syntax Typology (Linguistics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Nota di contenuto

Frontmatter -- Contents -- Glosses -- Introduction -- A.1 Functional Typologies -- The continuum of pragmaticity: a sketch -- Weighing semantic distinctions in person forms -- Spatial reciprocity: between grammar and lexis -- A chapter in marginal possession: on being six (ty) in Europe (and beyond) -- A.2 Constraints on the Encoding of Concepts -- Thoughts on (im)perfective imperatives -- Animacy and argument hierarchy in conflict: constraints on object-topicalization in Korean -- A.3 Limits of the Exponence of Functions: Zero -- Zero and nothing in Jarawara -- Clause linkage in a language without coordination: the adjoined clause in Iatmul -- B.1 Establishing Categories and Relations -- Once more on linguistic categories -- Questions surrounding the basic notions of the word, lexie, morpheme, and lexeme -- Linguistic typology and language theory: the various faces of syntax -- Linking without grammatical relations in Yucatec: alignment, extraction, and control -- B.2 Formal Typologies -- Areal typology of tone-consonant interaction and implosives in Kwa, Kru, and Southern-Mande -- The internal structure of adpositional phrases -- On the form of complex predicates: toward demystifying serial verbs -- Conjunctive coordination in Amharic: some typological approaches -- Linguistic type and complexity: some remarks -- B.3 Discovering Function in the Identity of Form -- Constituent questions and argument-focus constructions: some data from the North-Caucasian languages -- "A lot of grammar with a good portion of lexicon": towards a typology of partitive and pseudopartitive nominal constructions -- Backmatter

Sommario/riassunto

Language description enriches linguistic theory and linguistic theory sharpens language description. Based on evidence from the world's languages, functional-typological linguistics has established a number of thorough generalizations about the nature of linguistic categorizations and their manifestation in natural languages. Empirical studies in these fields of linguistics have contributed to sharpen linguistic theory in several respects. This volume is a collection of 19 contributions from outstanding scholars in the field of functional-typological linguistics that address fundamental issues in the study of language, such as the nature of linguistic categories, the constitution of functional domains, and the form of cross-linguistic continua. Empirical data from individual languages and from typological samples are investigated in order to achieve generalizations about the properties of human grammar(s). Several grammatical phenomena are dealt with including tonal systems, person distinctions, modalities, reciprocity, complex predicates, grammatical relations, word order, clause linkage, and information structure. The structure of the book illustrates the fundamental importance of the analytical distinction between the onomasiological and the semasiological approach to language and language diversity. Both perspectives are integrated in most papers with a dominant focus on either the former or the latter perspective.

Livello bibliografico	Monografia
Nota di contenuto	Volatilities -- Extensions of the Black-Scholes theory to other types of options (futures options, currency options, American options, path-dependent options, multi-asset options) -- Fundamentals: stochastic analysis and applications, interest rate dynamics, and basic principles of pricing interest rate derivatives.
Sommario/riassunto	This textbook provides the necessary techniques from financial mathematics and stochastic analysis for the valuation of more complex financial products and strategies. The author discusses how to make use of mathematical methods to analyse volatilities in capital markets. Furthermore, he illustrates how to apply and extend the Black-Scholes theory to several fields in finance. In the final section of the book, the author introduces the readers to the fundamentals of stochastic analysis and presents examples of applications. This book builds on the previous volume of the author's trilogy on quantitative finance. The

aim of the second volume is to present and discuss more complex and advanced techniques of modern financial mathematics in a way that is intuitive and easy to follow. As in the previous volume, the author provides financial mathematicians with insights into practical requirements when applying financial mathematical techniques in the real world.
