

1. Record Nr.	UNINA9910683361703321
Autore	Juan Ferrer Ana
Titolo	Beyond edge computing : swarm computing and ad-hoc edge clouds / / Ana Juan Ferrer
Pubbl/distr/stampa	Cham, Switzerland : , : Springer Nature Switzerland AG, , [2023] ©2023
ISBN	9783031233449 9783031233432
Edizione	[1st ed. 2023.]
Descrizione fisica	1 online resource (197 pages)
Disciplina	004.6782
Soggetti	Cloud computing Electronic data processing - Technological innovations Swarm intelligence
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	Chapter. 1. Introduction -- Part I. Current status of computing at the Cloud and network Edges -- Chapter. 2. Cloud Computing -- Chapter. 3. Mobile Cloud Computing -- Chapter. 4. Mobile Ad-hoc Cloud Computing -- Chapter. 5. Edge and Fog Cloud Computing -- Chapter. 6. Additional technologies for Swarm development -- Part II. Computing beyond the Edge: Swarm computing and Ad-hoc Edge Architectures -- Chapter. 7. Computing beyond Edge: The Swarm computing concept -- Chapter. 8. Building blocks for Ad-hoc Edge Clouds -- Chapter. 9. Cognitive Resource Management in Ad-hoc Edge Clouds -- Chapter. 10. Service Placement and Management -- Part III. Looking ahead, next steps for for Ad-hoc Edge Clouds and Swarm Computing realization -- Chapter. 11. Next steps for Ad-hoc Edge Cloud and Swarm Computing realization.
Sommario/riassunto	This book explores the most recent Edge and Distributed Cloud computing research and industrial advances, settling the basis for Advanced Swarm Computing developments. It features the Swarm computing concepts and realizes it as an Ad-hoc Edge Cloud architecture. Unlike current techniques in Edge and Cloud computing that solely view IoT connected devices as sources of data, Swarm

computing aims at using the compute capabilities of IoT connected devices in coordination with current Edge and Cloud computing innovations. In addition to being more widely available, IoT-connected devices are also quickly becoming more sophisticated in terms of their ability to carry considerable compute and storage resources. Swarm computing and Ad-hoc Edge Cloud take full advantage of this trend to create on-demand, autonomic and decentralized self-managed computing infrastructures. Focusing on cognitive resource and service management, the book examines the specific research challenges of the Swarm computing approach, related to the characteristics of IoT connected devices that form the infrastructure. It also offers academics and practitioners insights for future research in the fields of Edge and Swarm computing.
