

1. Record Nr.	UNISALENT0991003887529707536
Titolo	Particles and fields / Gordon Semenoff, Luc Vinet, editors
Pubbl/distr/stampa	New York : Springer, c1999
ISBN	038798402X (alk. paper)
Descrizione fisica	xvi, 489 p. : ill. ; 24 cm
Collana	CRM series in mathematical physics
Classificazione	LC QC174.45 53.3.11
Altri autori (Persone)	Semenoff, G. W. Vinet, Luc.author
Disciplina	530.14/3
Soggetti	Quantum field theory Gauge fields (Physics) Quantum Hall effect
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index

2. Record Nr.	UNINA9910683369103321
Titolo	COVID-19 : Current Status and Future Prospects / / edited by Peter A. Leggat, John Frean, Lucille Blumberg
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-6741-0
Descrizione fisica	1 online resource (354 pages)
Disciplina	614.592414
Soggetti	COVID-19 (Disease)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>On 11 March 2020, the World Health Organization declared COVID-19 a global pandemic, and the disease now affects nearly every country and region. Nearly 18 months later, COVID-19, caused by SARS-CoV-2, continues to present significant challenges to health systems, public health, and the economy of countries across both hemispheres. The morbidity and mortality of the infection caused by SARS-CoV-2 has been significant, and various waves of disease outbreaks initially overwhelmed hospitals and clinics in many countries and continue to do so. This influences everyone, and public health countermeasures have been dramatic in terms of their impact on employment, social systems, and mental health. This Special Issue collection follows on from the Special Issue "COVID-19: Current Challenges and Future Perspectives" and provides an avenue for authors from various disciplines to provide feedback on the response to and our future global preparedness for COVID-19, as well as to disseminate critical information about SARS-CoV-2 and the associated COVID-19 pandemic.</p>
