

1. Record Nr.	UNINA9910683380503321
Autore	Katra Itzhak
Titolo	Soil erosion . Volume II : dust control and sand stabilization / / Itzhak Katra
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , [2023]
ISBN	3-0365-6765-8
Descrizione fisica	1 online resource (204 pages)
Disciplina	631.45072
Soggetti	Soil conservation - Research Soil erosion - Research - Methodology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Soil erosion caused by wind is significant to Earth systems and human health. There is a strong interest in understanding the factors and processes of soil erosion caused by wind as well as in developing and applying methods to control dust emission from soils and to stabilize active sands. The Special Issue contains information on applications of natural and synthetic materials to reduce soil erosion, development of materials and methods, experimental methods and modeling, impacts on the soil quality and the environments, and quantification of the efficiency in dust control and sand stabilization applications.
