

1. Record Nr.	UNINA9910683382603321
Titolo	Innovative conservation cropping systems and practices / / by Chengfang Li, Lijin Guo, editors
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , [2023]
ISBN	3-0365-6777-1
Descrizione fisica	1 online resource (294 pages)
Disciplina	338.162
Soggetti	Alternative agriculture Cropping systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	<p>This Special Issue "Innovative Conservation Cropping Systems and Practices" is focused on the development and assessment of innovative conservation cropping systems and practices in determining system productivity and enhancing crop production and soil quality. It covers applied engineering for achieving a sustainable balance between productivity, environmental, and profitability factors, presenting a collection of research articles that cover a broad range of cropping systems and practices from the farmland ecosystem.</p>
