

1. Record Nr.	UNINA9910683383203321
Titolo	Hydrogen Bonds / / edited by Miroslaw Jabonski
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-6771-2
Descrizione fisica	1 online resource (238 pages)
Disciplina	541.22
Soggetti	Molecular structure Hydrogen bonding
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This reprint is excellent proof that, despite more than a hundred years of research into hydrogen bonds, they are still an interesting and fundamental topic in the natural sciences. The collected articles deal with various aspects of the existence of hydrogen bonds and show human ingenuity in the field of inventing and applying various techniques, both experimental and theoretical, in order to describe them more fully.
