

1. Record Nr.	UNISALENTO991003908009707536
Autore	Guirdham, Arthur
Titolo	Les Cathares et la réincarnation / Arthur Guirdham ; préface de Lawrence Durrell ; postface de René Nelli ; traduit de l'anglais par Claudine Brelet avec la collaboration du Erol Franko
Pubbl/distr/stampa	Paris : Payot, 1971
Descrizione fisica	223 p. : ill. ; 23 cm
Collana	Aux confins de la science
Altri autori (Persone)	Durrell, Lawrence Nelli, René Brelet, Claudine Franko, Erol
Disciplina	273.6
Soggetti	Catari Reincarnazione
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910683390103321
Titolo	Human Papillomavirus and Head and Neck Cancer // Heather Walline, editor
Pubbl/distr/stampa	Basel : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-6704-6
Descrizione fisica	1 online resource (268 pages)
Disciplina	616.911
Soggetti	Papillomavirus diseases
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	In the study of head and neck squamous cell carcinoma (HNSCC), we know that virally induced malignancies behave differently than those generated through other carcinogenic mechanisms. This paradigm extends into differences in tumor growth, treatment response and resistance, as well as invasion and metastasis. The inability to correctly diagnose and appropriately treat HNSCC at early stages has contributed to reduced survival for HNSCC patients, particularly those with HPV-negative disease. The examination of the molecular differences between HPV-positive and HPV-negative HNSCC will provide support for early diagnostic markers and guide appropriate treatment selection to improve patient care and survival. This Special Issue highlights current research efforts to understand the evolving contribution of human papillomavirus in HNSCC.
