

1. Record Nr.	UNINA9910683392103321
Titolo	Aquatic Emerging Contaminants and Their Ecotoxicological Consequences // edited by Francois Gagne, Stefano Magni, Valerio Matozzo
Pubbl/distr/stampa	Basel, Switzerland : , : MDPI - Multidisciplinary Digital Publishing Institute, , 2023
ISBN	3-0365-6534-5
Descrizione fisica	1 online resource (244 pages)
Disciplina	574.5263
Soggetti	Marine pollution Water - Pollution
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Considering the worldwide problem of aquatic pollution, we proposed this reprint, which presents a collection of articles on different aspects of environmental pollution, from monitoring to the evaluation of toxicity. In particular, the volume concerns the issues specifically related to emerging contaminants in aquatic environments, such as plastics and pharmaceuticals. However, to confer to this volume a more holistic view, some articles on priority pollutants, such as heavy metals and pesticides, are also reported.
