

1. Record Nr.	UNINA9910684595103321
Titolo	Industrial arene chemistry : markets, technologies, sustainable processes and case studies of aromatic commodities / / edited by Jacques Mortier
Pubbl/distr/stampa	Weinheim, Germany : , : Wiley-VCH, , [2023] ©2023
ISBN	3-527-82799-4 3-527-82798-6 3-527-82797-8
Descrizione fisica	1 online resource (2806 pages)
Disciplina	547.6
Soggetti	Aromatic compounds Chemical engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Intro -- Table of Contents -- Title Page -- Copyright -- Foreword -- Preface -- Section 1. The Markets for Aromatic Commodities -- Section 2. BTX, Naphthalene, and Higher Aromatics from FossilBased Sources -- Section 3. Aromatics from Methanol and Synthesis Gas -- Section 4. The Chemistry of Downstream Functional Aromatics -- Section 5. Sustainable Aromatics Production and Technology -- Volume 1 -- Section 1: The Markets for Aromatic Commodities -- 1 The FossilBased BTX Market -- 1.1 Introduction -- 1.2 Development of the Steel Industry - Extraction of Aromatics from Coke Oven Light Oil -- 1.3 Refining and Petrochemicals - Aromatics from Reformate and Pygas -- 1.4 Aromatics in Gasoline -- 1.5 Toluene and Mixed Xylenes for Chemical and Solvent Use -- 1.6 Benzene as Coproduct - Pricing Volatility -- 1.7 Paraxylene Production and Sourcing -- 1.8 Orthoxylene and Metaxylene as Coproducts -- 1.9 The Shift to Asia and Explosive Growth in China - Changing Regional Product Flows -- 1.10 Environmental Challenges: Decarbonization, a Future for Bio based Aromatics? -- 1.11 The Competitive Challenge for Europe -- 2 The Downstream Functional Aromatics Market -- 2.1 Introduction --

2.2 Benzene Derivatives -- 2.3 Toluene Derivatives -- 2.4 Xylene Derivatives -- 2.5 Outlook for Future Growth: Sustainability and the Impact of Recycling -- 3 Crude Oil to Chemicals: Industry Development and Strategic Implications -- 3.1 Driving Forces Behind Crude Oil to Chemicals -- 3.2 COTC Routes -- 3.3 COTC vs. Traditional Refinery Petrochemical Integration -- 3.4 Recent COTC Projects -- 3.5 Configuration and Technologies -- 3.6 Strategic Implications -- 3.7 Carbon Footprint and Sustainability -- References -- Section 2: BTX, Naphthalene and Higher Aromatics from FossilBased Sources -- 4 BTX from Light Hydrocarbons -- 4.1 Introduction.
4.2 Commercial Processes and Emerging Methods -- 4.3 Brief Principle and Elementary Step -- 4.4 Light Hydrocarbon Aromatization -- 4.5 Brief Comparison Between Zn/HZSM5 and Ga/HZSM5 -- 4.6 Deactivation of ZSM5 and Metal/ZSM5 Catalysts -- 4.7 Summary and Outlook -- Acknowledgments -- List of Abbreviations -- References -- 5 BTX Aromatics from Naphtha Hydrocarbons -- 5.1 Introduction -- 5.2 Naphtha -- 5.3 Dehydrocyclization by Monofunctional Metal Catalysts -- 5.4 Catalytic Naphtha Reforming by Bifunctional Catalysts -- 5.5 Aromatization by Monofunctional Acid Catalysts -- 5.6 In Summary -- References -- 6 BTX Aromatics from Heavier Material than Naphtha -- 6.1 Introduction -- 6.2 Heavier Material than Naphtha -- 6.3 Thermal Cracking -- 6.4 Catalytic Cracking -- 6.5 Hydroprocessing -- 6.6 In Summary -- References -- 7 BTX Aromatics from Other Conversion Processes -- 7.1 Introduction -- 7.2 Xylene Isomerization -- 7.3 Transalkylation (Disproportionation) -- 7.4 Hydrodealkylation -- 7.5 Methylation -- 7.6 Decarboxylation of Benzoic Acid -- 7.7 Hydrodeoxygenation of Phenolic Compounds -- 7.8 In Summary -- References -- 8 Bi and Trinuclear Aromatic Production -- 8.1 Introduction -- 8.2 Properties of Bi and Trinuclear Aromatics -- 8.3 Markets for Bi and Trinuclear Aromatics -- 8.4 Naphthalene -- 8.5 Anthracene -- 8.6 In Summary -- References -- 9 Extraction Separation of Aromatics -- 9.1 Introduction -- 9.2 Extraction of Aromatics Using Traditional Organic Solvents -- 9.3 Extraction of Aromatics Using Ionic Liquids -- 9.4 Extraction of Aromatics Using Deep Eutectic Solvents -- 9.5 Extractive Distillation of Aromatics from Aliphatics -- 9.6 Summary and Outlook -- Acknowledgments -- Abbreviations -- References -- 10 The Honeywell UOP CCR Platforming™ Process for BTX Production (Case Study) -- 10.1 Introduction -- 10.2 History.
10.3 Feedstock and Products -- 10.4 Reforming Reactions -- 10.5 Reforming Process Conditions -- 10.6 Reforming Catalysts -- 10.7 Process Flow Schemes -- 10.8 Economics -- 10.9 Forward Directions -- References -- 11 The Honeywell UOP ParexTM Process: Fifty Years of Growth for the Petrochemical Industry (Case Study) -- 11.1 Introduction -- 11.2 Development of Adsorptive Separation Technology for Paraxylene -- 11.3 Integration of Paraxylene Adsorption with Other Aromatic Technologies -- 11.4 Evolution of The UOP Parex Process -- 11.5 Outlook -- References -- 12 Forty Years of Xylene Isomerization Technology Deployment at ExxonMobil (Case Study) -- 12.1 Introduction -- 12.2 VaporPhase Xylene Isomerization (VPI) -- 12.3 EB DealkylationBased VPI Processes: An Evolutionary History -- 12.4 Significance of Xylene Loss -- 12.5 Retrofit of EBReforming Process to EBDealkylation Process -- 12.6 LiquidPhase Isomerization -- 12.7 Outlook for Xylene Isomerization Processes -- References -- 13 ExxonMobil PxMaxSM Process: Production of Paraxylene (Case Study) -- 13.1 Introduction -- 13.2 ShapeSelective Catalysis -- 13.3 Development of Selective Toluene Disproportionation Technology -- 13.4 Process Description -- 13.5 Paraxylene Recovery from Paraxylene

Enriched Effluent -- 13.6 STDP vs. Other Toluene Routes to Xylenes --
13.7 Economics Favoring STDP -- 13.8 Outlook -- References -- 14
BP/Amoco Paraxylene Crystallization Technology (Case Study) -- 14.1
Introduction -- 14.2 The BP Amoco pX Unit Fractionation Section --
14.3 The BP Amoco pX Unit Crystallization Section -- 14.4 The BP
Amoco pX Unit Refrigeration Section -- 14.5 Other New BP Amoco pX
Technologies -- 14.6 Summary -- Acknowledgments -- References --
15 Reactions and Mechanisms of Xylene Isomerization and Related
Processes -- 15.1 Introduction -- 15.2 EB Transalkylation Catalysts.
15.3 A Shape Selective Shift in the Mechanism for Ethyl Transfer --
15.4 EB Dealkylation Catalysts -- 15.5 Summary of the Effect of the
Shape Selective Shift in Ethyl Transfer or Removal -- 15.6 Dual Bed EB
TA and EB DE Catalysts -- 15.7 Comment on Optimal EB Conversion for
Selective Adsorption vs. Crystallization pX Units -- 15.8 Conversion of
C9 P& N CoBoilers Over EB TA and EB DE Catalysts -- 15.9 EB
Isomerization Catalysts -- 15.10 How the Shape Selective Shift in the
Mechanism of Ethyl Transfer or Removal Led to the Development of
Effective TOL/A9+ Transalkylation Catalysts -- 15.11 Thoughts on
Incorporating TOL/A9+ TA and/or STDP and/or Selective TOL
Alkylation By Methanol (STA) in an Aromatics Complex -- 15.12
Experimental Determination of the True Equilibrium Distribution of
Xylenes -- 15.13 Summary -- List of Abbreviations -- References --
Note -- 16 Honeywell UOP Tatoray Process: Maximizing Feed
Utilization for Aromatics Production (Case Study) -- 16.1 Introduction
-- 16.2 Process Chemistry -- 16.3 UOP Tatoray Catalysts -- 16.4 UOP
Tatoray Process -- 16.5 Summary -- List of Abbreviations --
References -- 17 The Honeywell UOP MX Sorbex™ Process: Enabling
Growth of PET Resin Applications (Case Study) -- 17.1 Introduction --
17.2 Mechanisms for MetaXylene Separation -- 17.3 Adsorbent and
Desorbent Selection -- 17.4 Commercial Applications -- 17.5 Outlook
-- References -- Section 3: Aromatics from Methanol and Synthesis
Gas -- 18 MethanoltoAromatics Compounds (MTA) Process -- 18.1
The Purpose of Developing MTA Technology -- 18.2 The Chemistry of
MTA: Mechanistic and Kinetic Considerations -- 18.3 The Preparation
of Catalysts in MTA -- 18.4 Effect of Operating Conditions -- 18.5
Reactor Technology of MTA -- 18.6 Perspectives -- References -- 19
Carbon Monoxide and Carbon Dioxide for Aromatics Production --
19.1 Introduction.
19.2 The Routes for Direct Aromatic Synthesis from CO and CO2 --
19.3 Catalyst Design Strategies for Improving Catalytic Performance of
Catalysts -- 19.4 Other Issues on the Production of Aromatics from CO
and CO2 -- 19.5 Process Simulation on the Technical Economics
Aspects -- 19.6 Summary and Outlook -- References -- Volume 2 --
Section 4: The Chemistry of Downstream Functional Aromatics --
Section 4.1: Alkylation -- 20 Homogeneous Friedel-Crafts Alkylation --
20.1 Industrial Friedel-Crafts Alkylation -- 20.2 Catalysts in Friedel-
Crafts Alkylation -- 20.3 Recent Advances in Friedel-Crafts Alkylation
-- 20.4 Outlook and Future -- References -- 21 Heterogeneous
Friedel-Crafts Alkylation -- 21.1 Introduction -- 21.2 Ethylbenzene
Synthesis by the Ethylation of Benzene -- 21.3 Cumene Synthesis by
the Isopropylation of Benzene -- 21.4 pXylene Synthesis by the
Isomerization of Xylene Isomers -- 21.5 pXylene Synthesis by Toluene
Disproportionation -- 21.6 pXylene Synthesis by Toluene Methylation
-- 21.7 Synthesis of Linear Alkylbenzenes -- 21.8 Alkylation of
Naphthalene and the Related Catalysis -- 21.9 Alkylation of Biphenyl
and Related Catalysis -- 21.10 Concluding Remark -- References -- 22
Badger Ethylbenzene Technology (Case Study) -- 22.1 Introduction --
22.2 Ethylbenzene Technology Overview -- 22.3 EBMAXSM Process

Description -- 22.4 Feedstocks for Ethylbenzene Production -- 22.5
Process Performance -- 22.6 Process Safety -- 22.7 Environmental Impact -- 22.8 Ethylbenzene Technology Outlook -- References -- 23
Exelus Styrene Monomer (ExSyM) Process (Case Study) -- 23.1 Styrene Industry Overview -- 23.2 Alkylation of Benzene with Ethylene -- 23.3
Dehydrogenation of Ethylbenzene to Styrene Monomer -- 23.4 PO/SM Route -- 23.5 Alternative Routes -- 23.6 Scheme of Reactions -- 23.7
Role of Acid-Base Sites -- 23.8 Ethylbenzene Formation.
23.9 Phenylethanol as Intermediate.
