| Sommario/riassunto      | The companion for companions The successful book for additional<br>caregivers now in an updated 4th edition. Caregivers take on an<br>important task in the care and accompaniment of people with dementia<br>and contribute to the improvement of the individual living situation.<br>This handbook supports not only everyday caregivers, but also<br>volunteers and professional caregivers in their meaningful and<br>demanding task. All the important basics are explained in an<br>understandable way to help people with dementia or mental illness to<br>cope with their everyday lives. From the contents Theory of illness -<br>understanding what is different Shaping everyday life - maintaining<br>abilities and ideas for occupational activities First aid - acting correctly<br>in difficult situations Housekeeping - caring for people with dementia<br>For caregivers in advanced training and practice, and for all people who<br>accompany people with dementia or limited competence in daily life<br>activities. The authors Simone Schmidt, nurse with advanced training in<br>gerontological psychiatry, quality manager and consultant for health<br>care, care expert, lecturer Martina Döbele, Care manager, TQM auditor, |

NLP master, lecturer and consultant in healthcare, head of nursing courses The translation was done with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.
