Sommario/riassunto	This book focuses on the administration streamlining aligned with the market-oriented reform process in China. The book is divided into two parts. The first part clarifies why administration is necessary and important, what it covers, and how to deal with the relation between the central and the local governments. The second part presents empirical analysis in specific areas, including agricultural reform, fiscal reform, government reform and education reform, and a series of decentralization reforms. This book is a collective wisdom from Peking University and is edited by Chinese economist Yining Li.
