

1. Record Nr.	UNINA9910687974803321
Titolo	Facial nerve palsy : a practitioner's guide // edited by Pratap Sanchetee, Kirti Sachdev, R. Rajeswari
Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (84 pages)
Disciplina	616.842
Soggetti	Facial paralysis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Introductory Chapter: Bell's Palsy -- 2. Medical System to Evaluate the Seventh Cranial Nerve through the Main Facial Mimic Muscles -- 3. Comprehensive Rehabilitation of Patients with Facial Expression Asymmetry and Synkinesis with Botulinum Toxin Type A and Monofilament Mesothreads -- 4. Reanimation of Mouth Corner with Free Gracilis Muscle Flap -- 5. Management of Bell's Palsy with Phototherapy.
Sommario/riassunto	The 7th cranial nerve, commonly known as the facial nerve, is a compound nerve having motor, parasympathetic and sensory components. Its motor portion innervates muscles for facial movement and expression. Facial paralysis is a common clinical condition that significantly impacts a patient's quality of life. Clinical evaluation is the primary diagnostic tool, and advanced imaging techniques are usually not needed. While a majority of patients with Bell's palsy recover spontaneously, patients are generally treated with a combination of steroids, antiviral drugs, and physiotherapy. In this book, experts discuss recent advances in the diagnosis and management of 7th cranial nerve paralysis, along with surgical options.
