

1. Record Nr.	UNINA9910687975303321
Titolo	Titanium dioxide : advances and applications / / edited by Hafiz Muhammad Ali
Pubbl/distr/stampa	London, England : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (244 pages)
Disciplina	546.512
Soggetti	Titanium dioxide Titanium dioxide crystals
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book presents a comprehensive overview of titanium dioxide, including recent advances and applications. It focuses on the compound's uses in environmental remediation, photocatalytic materials, rechargeable lithium-ion batteries, thin films, energy storage, semiconductors, and much more. This volume is a useful resource for researchers, scientists, engineers, and students.
