

1. Record Nr.	UNINA9910687981003321
Titolo	Psoriasis : new research // edited by Shahin Aghaei
Pubbl/distr/stampa	London : , : IntechOpen, , 2022 ©2022
Descrizione fisica	1 online resource (xii, 198 pages) : illustrations
Disciplina	616.526
Soggetti	Dermatology Psoriasis
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. The Clinical Characteristics and Treatment Status of Psoriatic Arthritis -- 2. Dermoscopic Differential Diagnosis of Psoriasis -- 3. Psoriasis and Skin Comorbidities -- 4. Th17/IL-17, Immunometabolism and Psoriatic Disease: A Pathological Trifecta -- 5. Immune Markers in Psoriasis -- 6. Immunomodulatory Effect of Methotrexate Abruptly Controls Keratinocyte Activation in Psoriasis -- 7. Topical Moisturisers for the Management of Psoriasis Vulgaris -- 8. Developing Novel Molecular Targeted Therapeutics for Topical Treatment of Psoriasis.
Sommario/riassunto	Psoriasis is a chronic skin disease that starts with lesions that appear red, thick, scaly, and itchy with bilateral and symmetrical distribution. The lesions are most often seen in the scalp, elbows, knees, and genitalia. The extent of the lesions is not always limited to these areas, and in some cases, it may involve larger parts of the skin, as well as nails and joints in some cases. This book presents a comprehensive overview of psoriasis, including clinical aspects, differential diagnosis by dermoscopic devices, comorbidities, immune system changes, methotrexate therapy, and topical innovative molecular targeted therapeutics.
