List Of Praefecti Praetorio Between AD 193 And 284

Sommario/riassunto

This book deals with changing power and status relations between the highest ranking representatives of Roman imperial power at the central level, in a period when the Empire came under tremendous pressure, AD 193-284. Based on epigraphic, literary and legal materials, the author deals with issues such as the third-century development of emperorship, the shift in power of the senatorial elite and the developing position of senior military officers and other high equestrians. By analyzing the various senior power-holders involved in Roman imperial administration by social rank, this book presents new insights into the diachronic development of imperial administration, appointment policies and socio-political hierarchies between the second and fourth centuries AD.

Sommario/riassunto

Leishmaniasis is a major global health challenge, affecting approximately 12 million of the poorest people in 100 countries. It is a deforming and fatal disease in the visceral form. Therapies for leishmaniasis are numerically restricted, basically consisting of the administration of miltefosine, pentavalent antimonials, amphotericin B,

or pentamidine. This is an important vulnerability against therapy efficiency that must be overcome by the scientific community. This book discusses important aspects of the disease, such as treatment, epidemiology, and molecular and cell biology. The information contained herein is important for young researchers as they seek to develop safe and effective treatments for this neglected tropical disease.
