

1. Record Nr.	UNINA9910688169703321
Titolo	Enterobacteria / / edited by Sonia Bhonchal Bhardwaj
Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (ix, 107 pages)
Disciplina	579.34
Soggetti	Enterobacteriaceae
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Uropathogenic <i>Escherichia coli</i> -- 2. Bacteriophage Therapy for Urinary Tract Infections Caused by <i>Escherichia coli</i> -- 3. <i>Salmonella</i> Infection and Pathogenesis -- 4. <i>Salmonella</i> in Wild Animals: A Public Health Concern -- 5. <i>Salmonella</i> : The Critical Enteric Foodborne Pathogen -- 6. Phenotypic Characterisation of Carbapenemases Produced by Enterobacteria Isolated from Patients of the Medico-Social Centre of the National Social Insurance Fund of Maroua: Cameroon -- 7. Foodborne Pathogens of Enterobacteriaceae, Their Detection and Control.
Sommario/riassunto	Enterobacteriaceae are a large family of Gram-negative bacteria including <i>Escherichia</i> , <i>Salmonella</i> , <i>Shigella</i> , <i>Klebsiella</i> , <i>Yersinia</i> , and others. They are associated with intestinal and extra-intestinal diseases, such as urinary tract infections and diarrhea. This book examines enterobacteria with a focus on pathogenesis, virulence factors, and treatment strategies, as well as their role in multidrug resistance.
