

1. Record Nr.	UNINA9910688188903321
Titolo	Le groupe episcopal et canonical d'Autun : 20 ans de recherches archeologiques / / edited by Sylvie Balcon, Walter Berry, Christian Sapin
Pubbl/distr/stampa	Pessac : , : Ausonius Editions, , 2021 ©2021
Descrizione fisica	1 online resource
Collana	collection DAN@ ; ; 6
Disciplina	712.5
Soggetti	Urban landscape architecture
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	In 1983, with a view to developing the site, an archaeological study began, largely centred on the site of the former canonical cloister of Saint-Nazaire d'Autun, mentioned in documents as early as the 9th century, and taking into account both the buried remains and the remarkably preserved elevations. At the same time, the remains of the old cathedral were being analysed, as opportunities arose. The various interventions revealed the importance of this site, which gradually faded into the urban landscape in favour of the Cathedral of Saint Lazarus, erected at the beginning of the 12th century, while at the same time helping to renew our knowledge of the episcopal and canonical groups.

2. Record Nr.	UNINA9910298330003321
Autore	Daw Nigel W
Titolo	Visual Development / / by Nigel W. Daw
Pubbl/distr/stampa	New York, NY : , : Springer US : , : Imprint : Springer, , 2014
ISBN	1-4614-9059-6
Edizione	[3rd ed. 2014.]
Descrizione fisica	1 online resource (252 p.)
Disciplina	610 610.28 612.8 617.7
Soggetti	Neurosciences Ophthalmology Biomedical engineering Biomedical Engineering and Bioengineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous edition: 2006.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Introduction -- Functional Organization of the Visual System -- Part I: Development of the Visual System -- Development of Visual Capabilities -- Anatomical Development of the Visual System -- Development of Receptive Field Properties -- Part II: Amblyopia and the Effects of Visual Deprivation -- Modifications to the Visual Input that lead to Nervous System changes -- Known Physiological and Anatomical changes from optical and motor deficits -- What is Amblyopia? -- Critical Periods -- Treatment of Amblyopia -- Part III: Mechanisms of Plasticity -- Concepts of Plasticity -- Mechanisms of Plasticity in the Visual Cortex -- Deprivation Myopia and Emmetropization -- Index.
Sommario/riassunto	The only book on the market to cover the psychophysics, anatomy, physiology, and clinical deficits of the developing visual system in an accessible format and length. The visual system is the most commonly studied aspect of the nervous system and is the primary model for the study of both normal development and the effects of environment and sensory deprivation on development. This third edition highlights new research and features a large number of illustrations, many in color. It

can be used as a supplementary text in neuroscience and ophthalmology courses. This book is a great resource for both novice and advanced researchers in the field of vision.
