Record Nr. Titolo	UNINA9910688217703321 Pheochromocytoma, Paraganglioma and Neuroblastoma / / edited by Pasquale Cianci, Enrico Restini and Amit Agrawal
Pubbl/distr/stampa	London : , : IntechOpen, , 2021 ©2021
Descrizione fisica	1 online resource (xi, 130 pages) : illustrations
Disciplina	616.9948
Soggetti	Neuroblastoma
	Nonchromaffin paraganglioma Pheochromocytoma
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Pheochromocytoma, paraganglioma and neuroblastoma are the most common neural crest-derived tumors in adults and children, respectively. These neoplasms are associated with significant morbidity and mortality. Some international studies currently underway are researching and evaluating the presence of any similarities and differences between these tumors. Hopefully, future results will reveal several potential novel genes and pathways that might have major roles in the pathogenesis and progression of these neoplasms. This book discusses epidemiology, genetics, and treatment of these malignancies.
