

1. Record Nr.	UNINA9910688218203321
Autore	Roth Andreas
Titolo	Specification and verification of object-oriented software components / / Andreas Roth
Pubbl/distr/stampa	[Place of publication not identified] : , : KIT Scientific Publishing, , 2006
Descrizione fisica	1 online resource (268 pages)
Disciplina	005.3
Soggetti	Component software
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This work presents a flexible methodology for formally specifying and deductively verifying object-oriented components. It is based on a simple notion of program correctness. Correctness can be achieved with a novel system of proof obligations, which serve as input to a suitable theorem prover.
