

1. Record Nr.	UNINA9910688224303321
Titolo	Advances in High-Entropy Alloys : materials research, exotic properties and applications / / edited by Jiro Kitagawa
Pubbl/distr/stampa	London [England] : , : IntechOpen, , 2021
Descrizione fisica	1 online resource (154 pages)
Disciplina	669.94
Soggetti	Order-disorder in alloys
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	High-entropy alloys (HEAs) are a new class of materials attracting attention from researchers all over the world. This book provides a comprehensive overview of the research on HEAs, as well as discusses the mechanical, physical, and chemical properties of new HEAs and their potential applications. Chapters cover such topics as HEA superconductors, HEA composites, high-entropy superalloys, artificial intelligence in HEA design, and more.
