

1. Record Nr.	UNINA9910688246103321
Titolo	Fungal reproduction and growth / / Sadia Sultan, Gurmeet Kaur Surindar Singh, editors
Pubbl/distr/stampa	London : , : IntechOpen, , [2022]
Descrizione fisica	1 online resource (136 pages)
Disciplina	589.2
Soggetti	Fungi - Growth Fungi - Physiology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	One of the largest and most diverse kingdoms in eukaryotes is fungi, which consists of approximately 2.2-3.8 million species. This book provides readers with an in-depth understanding of fungi diversity and the role of fungi in the ecosystem. Chapters address such topics as fungi reproduction and pathology, fungal mycotoxicity, fungi mating mechanisms, and much more.
