

1. Record Nr.	UNINA9910688253903321
Titolo	Plant Hormones : recent advances, new perspectives and applications / / Christophe Hano, editor
Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (214 pages)
Disciplina	581.1
Soggetti	Plant physiology Growth (Plants)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Plant hormones are among the most essential biochemicals found in plants. Since Charles and Francis Darwin identified auxin action, several plant hormones have been discovered. These small signaling molecules regulate not only developmental and growth activities, but also stress responses throughout the plant's life cycle. This book discusses recent advances, new perspectives, and applications of plant hormones. It is a useful resource for academics, scientists, students, and industry professionals.
