

1. Record Nr.	UNINA9910688262003321
Titolo	New Knowledge about Pulmonary Thromboembolism // Jelena Stojsic, editor
Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (86 pages)
Disciplina	616.249
Soggetti	Pulmonary embolism Thromboembolism
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Thromboembolism is the most common cause of death in autopsied patients. Recently, this disorder has become a topic of interest due to it being a frequent complication of COVID-19 infection. This book discusses pulmonary thromboembolism in COVID-19 and non-COVID-19 patients, such as those with malignancies such as paraneoplastic symptoms or heart and lung diseases.
