1. Record Nr. UNINA9910688274303321 Transportation Systems Analysis and Assessment / / edited by Stefano Titolo De Luca, Roberta Di Pace, Boban Djordjevic Pubbl/distr/stampa London:,:IntechOpen,,2020 Descrizione fisica 1 online resource (236 pages): illustrations Disciplina 388.068 Soggetti Transportation - Planning Lingua di pubblicazione Inglese **Formato** Materiale a stampa Livello bibliografico Monografia Sommario/riassunto The transportation system is the backbone of any social and economic system, and is also a very complex system in which users, transport means, technologies, services, and infrastructures have to cooperate with each other to achieve common and unique goals. The aim of this book is to present a general overview on some of the main challenges that transportation planners and decision makers are faced with. The book addresses different topics that range from user's behavior to travel demand simulation, from supply chain to the railway infrastructure capacity, from traffic safety issues to Life Cycle Assessment, and to strategies to make the transportation system more

sustainable.
