Health Insurance in the United States: Failure of Private and Multi-Payer Financing -- 9. Value-Based Contracting in Health Care -- 10. Socio-Economic Considerations of Universal Health Coverage: Focus on the Concept of Health Care Value and Medical Treatment Price.
Sommario/riassunto	Health insurance is the mechanism used to cover medical expenses for illness, injuries, and other health conditions. There are a variety of health insurance systems in the world. A major challenge for low- and middle-income countries is the provision of universal health coverage (UHC), which is the United Nations' Sustainability Development Goal Target 3.8. This book examines issues of providing UHC in different health systems around the world, with examples from the Philippines, Portugal, Nigeria, Slovenia, and the United States.
