

1. Record Nr.	UNINA9910688318903321
Titolo	Crystal Growth / / edited by Vadim Glebovsky
Pubbl/distr/stampa	London : , : IntechOpen, , 2019
Descrizione fisica	1 online resource (xiv, 112 pages)
Disciplina	548.5
Soggetti	Crystal growth
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	In this book, a variety of topics related to crystal growth is extensively discussed. The topics encompass the physics of growing single crystals of different functional materials, single-crystalline thin films, and even the features of crystallization of biofats and oils. It is intended to provide information on advancements in technologies for crystal growth to physicists, researches, as well as engineers working with single-crystalline functional materials.
