Sommario/riassunto	Renewed attention is being given to global agricultural productivity such as food security, food prices, financial viability of farm businesses under rising costs, declining availability and affordability of critical inputs including suitable land, etc. Thus, farming systems need to combine space maintenance and food herds in rural areas. Facing these new challenges, interest in grasses and grasslands as important forage systems has increased over the past 30 years, due to their economic, environmental, and ecological properties. A better use of economic and ecological potentials requires an understanding of their functions, and the development of tools for feeding herds, managing space, maintaining biodiversity, and limiting pollution. This book intends to provide the reader with the latest aspects on grasses and grassland for the well-being of farming systems.

Sommario/riassunto	This e-book consists of cutting-edge examinations of policing issues from a variety of behavioural perspectives. Collectively, the articles in this volume confront several under-researched aspects of police behaviour - from officer downtime to police-public interactions; from the controversial racially-biased policing to 'appropriate' use of force. This collection of articles provides a thought-provoking account of issues faced by police professionals, and will be of interest to both practising officers and researchers alike.
