

1. Record Nr.	UNINA9910688336903321
Titolo	Surgical infections : some facts / / edited by Manal Mohammad Baddour
Pubbl/distr/stampa	London : , : IntechOpen, , [2020] ©2020
Descrizione fisica	1 online resource (98 pages) : illustrations
Disciplina	617.01
Soggetti	Surgery - Complications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	<p>Skin is a natural barrier to infection. Surgical breakage of skin can lead to surgical site infections (SSIs). SSIs are relatively common and constitute a problematic issue in surgical procedures. Most common organisms include Gram-positive, such as <i>Staphylococcus</i> and <i>Streptococcus</i>, as well as Gram-negative, such as <i>Pseudomonas</i> and others, bacteria. The extent and outcome of SSI can vary widely depending on the procedure, organism, extent, and other factors, and can result in discomfort, severe morbidity, or even life-threatening conditions. It is thus mandatory to be aware of and follow WHO and CDC guidelines for the prevention of SSIs and to reduce risk factors for acquisition. This book sheds light on certain aspects related to SSIs and how to avoid them.</p>
