

1. Record Nr.	UNINA9910688351303321
Autore	Bracken Paul
Titolo	Manifolds III : Developments and Applications // Paul Bracken
Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (114 pages)
Disciplina	516.07
Soggetti	Manifolds (Mathematics)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di contenuto	1. Free Actions of Compact Lie Groups on Manifolds 2. Perspective Chapter: Quasi Conformally Flat Quasi Einstein-Weyl Manifolds 3. An Introduction to the Generalized Gauss-Bonnet-Chern Theorem 4. Smooth Structures on Spin Manifolds in Four Dimensions 5. Geometric Properties of Classical Yang-Mills Theory on Differentiable Manifolds.
Sommario/riassunto	The subject of manifolds is an exciting area of research in modern mathematics. This volume presents five chapters that discuss manifolds and some of their applications to other areas of study. It is designed to provide researchers further insight into what is current in the field and will hopefully spur further study.
