

1. Record Nr.	UNISALENTO991001008259707536
Autore	Fulton, William
Titolo	Intersection theory / William Fulton
Pubbl/distr/stampa	New York : Springer-Verlag, c1998
ISBN	0387985492
Edizione	[2nd ed]
Descrizione fisica	xiii, 470 p. ; 25 cm.
Classificazione	AMS 14C17
Disciplina	516.35
Soggetti	Intersection theory
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	"Softcover printing 1998 of the second edition 1998, which was originally published as vol. 2 of the series Ergebnisse der Mathematik und ihrer Grenzgebiete, 3. Folge": T.p. verso. Includes index. Bibliography: p. [442]-461

2. Record Nr.	UNINA9910688351703321
Titolo	Inelastic X-Ray Scattering and X-Ray Powder Diffraction Applications / / Alessandro Cunsolo, [and three others], editors
Pubbl/distr/stampa	London : , : IntechOpen, , 2020
Descrizione fisica	1 online resource (130 pages)
Disciplina	548.83
Soggetti	X-ray crystallography X-rays - Diffraction
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book illustrates a few exemplary scientific topics addressed through the use of two complementary x-ray scattering techniques: inelastic x-ray scattering and x-ray powder diffraction. These scattering methods are the focus of the two main sections of this book. These sections are subdivided into chapters discussing specific applications. The general aim of this volume is providing a concise overview of the opportunities disclosed by these two experimental methods, providing some guidance for scientists picking up this field and, hopefully, inspiring more mature scientists towards the achievement of new advances in this area.
