Pubbl/distr/stampa	London : , : IntechOpen, , 2022
Descrizione fisica	1 online resource (130 pages)
Disciplina	610.73
Soggetti	Cardiogenic shock
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Trauma surgery is a surgical specialty that utilizes both operative and non-operative management to treat traumatic injuries, typically in an acute setting. The trauma surgeon is responsible for initially resuscitating and stabilizing and later evaluating and managing the patient. Emergency surgery is surgery to treat trauma or acute illness after an emergency presentation. This book examines trauma and emergency surgery for abdominal, aortic, chest, brain, and burn injuries.
