Autore	Martinez Diaz David José
Titolo	Production cost models with regard to liberalised electricity markets
Pubbl/distr/stampa	KIT Scientific Publishing, 2008
ISBN	1000009066
Descrizione fisica	1 online resource (XVIII, 115 p. p.)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This book makes a contribution to the formulation and implementation of production cost models for the modelling of liberalized electricity markets by addressing issues associated with the level of detail in the representation of the underlying power system, the accuracy of the results and the modelling effort. To this end a production cost model was formulated and applied to estimate the short-run marginal cost of the power systems of three important European electricity markets.
