

1. Record Nr.	UNINA9910688434703321
Titolo	Horticultural Crops // edited by Hugues Kossi Baimey, Nouredine Hamamouch, Yao Adjiguita Kolombia
Pubbl/distr/stampa	London, United Kingdom : , : IntechOpen, , 2020
Descrizione fisica	1 online resource (220 pages) : illustrations
Disciplina	635
Soggetti	Horticultural crops Horticultural crops - Diseases and pests
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Horticultural crops are important for human nutrition. To guarantee successful cultivation for quality and quantity yield, proper identification of pests and diseases, as well as abiotic factors undermining their production, is essential. This ten-chapter textbook describes fungi, bacteria, insects, and nematodes as important issues in horticulture. It documents their epidemiology and management strategies such as genetics and botanical and biological control used for their management. This comprehensive resource is essential for students and researchers of plant genetics, pathology, entomology, and nematology.
