

1. Record Nr.	UNINA9910688491003321
Titolo	ADHD : from etiology to comorbidity / / edited by Hojka Gregoric Kumperscak
Pubbl/distr/stampa	London : , : IntechOpen, , 2021 ©2021
Descrizione fisica	1 online resource (104 pages)
Disciplina	618.928589
Soggetti	Attention-deficit hyperactivity disorder
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	Attention Deficit Hyperactivity Disorder (ADHD) is the most prevalent neurodevelopmental disorder. Previously, it was considered a disorder that affected children only. Recently, however, there is no doubt that ADHD can affect adults as well, but with different clinical presentation. Thus, it is critical to understand how the clinical picture of the disorder changes with development. Traditional ADHD diagnostic procedures are broadening and incorporating new entities like endophenotypes. Comorbidity is a rule, especially if ADHD is not recognized and treated early. New genetic studies bring deeper and more concise knowledge about the disorder's etiology. This book addresses these aspects of ADHD to bring about more clarity and understanding of the disorder.
