

1. Record Nr.	UNINA9910688495403321
Titolo	Saliva and Salivary Diagnostics // Sridharan Gokul, editor
Pubbl/distr/stampa	London : , : IntechOpen, , 2019
Descrizione fisica	1 online resource (96 pages)
Disciplina	612.313
Soggetti	Salivary glands
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Salivary diagnostics have advanced exponentially in the past decade. Saliva collection is easy and non-invasive and allows for detecting a myriad of biomarkers, making it a promising diagnostic tool. Salivary analytes have been evaluated for their role as potential biomarkers in oral cancer, cancer of distant sites, dental caries, periodontal diseases, oral microbial infections, and autoimmune disorders, as well as in diagnosis of systemic diseases. This book presents a thorough knowledge of the functions and properties of saliva, its role in health and disease, and the diagnostic technologies available for the identification of saliva biomarkers.
