

1. Record Nr.	UNINA9910688559903321
Autore	Negretti Maria Eletta
Titolo	Hydrodynamic instabilities and entrainment in two-layer stratified flows down a slope
Pubbl/distr/stampa	KIT Scientific Publishing, 2007
ISBN	1000006963
Descrizione fisica	1 online resource (XXIV, 120 p. p.)
Collana	Dissertationsreihe am Institut für Hydromechanik der Universität Karlsruhe / Universität Karlsruhe (TH), Institut für Hydromechanik
Soggetti	History of engineering and technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Fluid mechanical problems related to two-layer flows are of considerable interest in a variety of geophysical, atmospheric and engineering contexts. A two-layer counter-current flow system over a submerged sill is investigated. The effect of higher Reynolds numbers and of enhanced bottom roughness on the generation and development of hydrodynamic instabilities between the two layers are investigated by means of physical experiments and linear stability analysis.
