

1. Record Nr.	UNINA9910688570703321
Autore	Tynkkynen Veli-Pekka
Titolo	The energy of Russia : hydrocarbon culture and climate change // Veli-Pekka Tynkkynen
Pubbl/distr/stampa	Cheltenham, UK : , : Edward Elgar Publishing Limited, , 2019
ISBN	1-78897-860-9
Descrizione fisica	1 online resource (168 pages)
Disciplina	333.790947
Soggetti	Energy policy - Russia (Federation) Hydrocarbons
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents: Preface -- 1. Introduction - Hydrocarbon culture amidst a changing climate -- 2. Russia's energy via a spatial prism - energy flows in a mycelium of power -- 3. Energy as domestic power - the case of Gazifikatsiya Rossii -- 4. Energy as international power - the case of Russian-Finnish energy trade -- 5. The national taboo of hydrocarbon culture - changing the arctic environment -- 6. The global taboo of hydrocarbon culture - "there is no climate change" -- 7. The climate is changing Russia - from a hydrocarbon to an ecological culture -- References -- Index.
Sommario/riassunto	"This timely book analyses the status of hydrocarbon energy in Russia as both a saleable commodity and as a source of societal and political power. Through empirical studies in domestic and foreign policy contexts, Veli-Pekka Tynkkynen explores the development of a hydrocarbon culture in Russia and the impact this has on its politics, identity and approach to climate change and renewable energy. Cogent and compelling, this book demonstrates how the Russian state leverages its oil and gas reserves in order to create and maintain power both domestically and internationally. Tynkkynen uses empirical studies of key topics such as the national gas programme Gazprom, the Arctic, climate discourse and anthropogenic climate change denial, and the Russia-Finland energy trade to critically examine the situation. The book concludes with a convincing argument for the potential of renewable energy to build a more resilient and sustainable future for

Russia and how this might be achieved. This will prove crucial reading for scholars and students of Russian and Eastern European studies and energy and environmental studies, as well as geographers, anthropologists and political scientists. Those working in governments, international organizations and corporations with an interest in Russian energy will also find its insights useful"--

Nota di contenuto

Chapter 1. Introduction -- Chapter 2. EU Data Protection Legislation -- Chapter 3. The Right to Data Protection: The Jurisprudence of the CJEU -- Chapter 4. The Right to Data Protection: The Current Doctrinal Discourse -- Chapter 5. The Right to Data Protection: The Dualistic Approach -- Table of Cases -- Bibliography -- Index.

Sommario/riassunto

This book advances an approach that combines the individual and the structural, systemic dimensions of data protection. It considers the right to data protection under the EU Charter and its relationship to the secondary legislation. Furthermore, the case law of the Court of Justice of the EU as well as current academic conceptualizations are analysed. The author finds that current approaches invariably link data protection to privacy and often fail to address the structural implications of data processing. He therefore suggests a dualistic approach to data protection: in its individual dimension, data protection aims to protect natural persons and their rights, while the structural dimension protects the democratic society as a whole from the adverse effects of data processing. Using this approach, the full potential of an independent right to data protection can be realized. Researchers, practitioners and students will find this a valuable resource on the rationales, scope and application of data protection. Felix Bieker is Legal Researcher at the Office of the Data Protection Commissioner of Schleswig-Holstein (Unabhängiges Landeszentrum für Datenschutz) in Kiel, Germany.
