

1. Record Nr.	UNINA9910688572903321
Titolo	Biomechanics and Functional Tissue Engineering // edited by Ziyad S. Haidar, Ibrokhim Y. Abdurakhmonov and Abdelwahed Barkaoui
Pubbl/distr/stampa	London : , : IntechOpen, , 2021
Descrizione fisica	1 online resource (268 pages) illustrations
Disciplina	610.28
Soggetti	Tissues - Mechanical properties Tissue engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	Biomechanics and Functional Tissue Engineering is a useful resource for scientists, researchers, engineers, and clinical practitioners involved in bioengineering solutions for improved patient quality of life. It focuses on the potentially impactful role of applied and functional bio-dental tissue engineering, drug/gene delivery (controlled and metered systems) and cell therapy, bioscaffolds, image-guided and image-assisted surgery, nanodentistry, and biomechanics towards developing better solutions for problems and conditions of the orodental and cranio-maxillofacial complex and beyond.
